

xDrip Notification on Tizen Watch - exportet with Tasker and Autonotification and integrated to Watchmaker Watchfaces

1. Update V1.1 25.08.2019

Changelog: every variable got a own Tag. Now you are able to script a color changer for BG Value for <70 red and for >200 yellow in between is white but.

But that color changer have to be scripted with LUA ;-) this will be updatet soon.

Please follow Freddy_x on Watchmaker to get Updates. ;-)

1. Download Tasker (1,99€), AutoNotification(2,39€) and WatchMaker (premium 6,99 € Abo 7,49€ monthly) from the Google Play Store you need Watchmaker Premium for my Watchface
2. Install the WatchMaker companion app (2,49€) onto the watch using the Galaxy Store, set WatchMaker as your watch face.
3. Open Autonotification
